CAROTS

Wanted: Scientific entrepreneurs

Are you

- a **scientist or engineer** with experience in an advanced analytical method, for example at a large-scale research infrastructure such as a synchrotron or a neutron source or in collaboration with a university?
- **interested in bridging the gap between science and industry** by providing consulting services based on advanced scientific measurement methods, ideally with processing and interpretation of the data
- **playing with the idea of becoming a "sciencepreneur"** and turning your skills into a business?

Then you should join us at the
CAROTS STARTUP SCHOOL

STARTUP SCHOOL 2021

Calling all scientific entrepreneurs

CAROTS STARTUP SCHOOL

for Scientific Business Ideas

Why participate?

- We will provide you with **direct access to the expertise of some of Europe's leading CEOs** of scientific service companies
- You can take part in **tailored webinars** on topics such as Starting a scientific service company - dos and don'ts, Marketing, How to cooperate and navigate within large-scale research infrastructure eco-systems, Pricing, Accounting & writing a business plan
- You will get the opportunity to **join a European network of likeminded people and successful scientific service companies**

The scope of your analytical technique is not limited to certain methods or industrial sectors. Be it life science, materials science, chemistry, pharma research - if you think you can provide an advanced analytical technique which is of interest for science driven SMEs and/or large industrial R&D departments, tell us about your skills and ideas and join us for the CAROTS STARTUP SCHOOL for Scientific Service Companies!

All you need to apply is to complete a short registration form. We have limited spaces available so please apply now:

www.carots.eu/startup_school

Deadline for applications: 31st January 2021

Online coaching and monthly webinars start in March 2021 through to June 2021

Who can apply?

You are a scientist or engineer (you can register individually or as a team):

- working as researcher at a university or other research institution
- who has an idea for a new scientific service company
- whose idea is based on an advanced analytical technique, for example at a large-scale research infrastructure such as a synchrotron or a neutron source or in collaboration with a university
- who has found that there is a need in industry for this technique and your expertise in it

The only commitment we need from you is to take part enthusiastically and come with a great idea. Then leave the rest to us as we provide you with the best knowledge, coaching and access to experts and a large network.
